TECHNO - PEDAGOGICAL SKILLS IN TEACHING LEARNING PROCESS

A. PACKIAM

Ph.D. Scholar, Department of Education, Madurai Kamaraj University, Madurai

Introduction

The education system was authentically a model shift from the old -fashioned chalk and board teaching methodology to computerize the pedagogical approach through technical devices. An important contribution of techno pedagogy is to develop the teacher's abilities to survey teaching from the frame of mind of learners who bring various experiences and approach to the classroom. It is important to accept that, teacher educators and learners are becoming more proficient in information and technology. Therefore, the appropriate technology inclination needs to improve to provide themselves to view the students belong to the net era and also to view the challenges in the modern classroom.

Techno- Pedagogical Skills

Techno-pedagogical eligibility is the ability of teachers to construct the use of technology advantageously in teaching. It is described as the skill and the wish to regularly apply the skills, attitude and knowledge. In techno- pedagogy classified into three areas of knowledge such as

- Content - content contains the subject matter
- Pedagogy- pedagogy contains studying teaching methods.
- Technology - technology contains aspects of teaching.

This is the mixed or crossed method of teaching in which ICT is being used in the Teaching learning process. It refers to the art-skill. Thus, techno-pedagogy refers to the technique of craft to Teaching into the learning environment itself.
